CMS-1000FM

Central Monitoring System

CMS-1000FM is a comprehensive central nursing system for the obstetric cares. It is an integrated system that covers the entire continuum of obstetric care across the whole pregnancy stage from the first antepartum visit to post delivery care. The system displays data and information transmitted from fetal and maternal monitors and generates alerts for critical events. Easy access to well-organized information improves efficiency, allowing you to focus more attention on patients and achieve the best quality of care.

- Web viewer for remote monitoring from doctors' PCs
- Built-in antepartum CTG analysis
- Display up to 6 waveforms of each bedside monitor simultaneously
- Review of events, CTG waveforms, trends and NIBP data
- Large capacity of storage up to 100,000 records
- Wired & wireless central monitoring system solution
- Connection of up to 32 bedside fetal/maternal monitors
- Up to 24 hours monitoring data for each record
- Up to 200 groups of NIBP data
- Export PDF format report
